Profile

Currently exploring physical computing, creative technology, and the future of interaction.

I've explored fragments of different paths along the way, with each field shaping the way I think through systems, patterns, and logic before eventually leading me to design. Interested in the intention beneath surface aesthetics, not only how things look, but how people behave, how technologies evolve, and how interactions can feel more natural, thoughtful, and human.

Experienced in independently designing end-to-end user experiences, from ***research*** and ***interaction flows*** to ***prototyping*** and ***experimental exploration***. Through repetition and hands-on problem solving, I've developed the ability to think through interaction flows systematically while balancing both user needs and business context.

Education

Bachelor of Arts, Language and Information Technology
Chulalongkorn University (2021 – 2025)

Skills

- Human-Centered & Contextual Design
- Research-Driven & Data-Informed Design
- User Experience & User Interface Design
- Technology, AI & Interaction Design
- Design Systems
- Experimental Design
- SEO & Content Strategy
- Interactive Prototyping
- Validation & Iteration

Languages

Thai (Native)

English (Fluent in both spoken and written)

Experiences

UX/UI Designer at Smile Education

06/2026 - Present | Education | Bangkok,Thailand

- Designed Smart Math Pro's platform, campaign landing pages, and new product features, collaborating with the marketing team to translate business briefs into UX requirements. Worked across the end-to-end design process, from research to design handoff.

UX/UI Designer at SourceCode

06/2025 - 06/2026 | AI Digital Transformation | Bangkok,Thailand

- Designed user interfaces for ***back-office*** and ***POS systems*** for a retail client (Tanachira), covering core retail operations and administrative workflows.
- Translated customer requirements into user-centered UX flows and UI designs, working closely with cross-functional teams (BA, SA, PM, developers, and stakeholders) in an Agile/Scrum environment to ensure smooth implementation.
- Led the end-to-end redesign of the company website, from research and user flows to brand identity and design system.

Pre-Career Experiences

UX Trainee at SCG Home

07/2024 – 04/2025 | Home Solution Provider | Bangkok, Thailand

- SCG Home UX Case Study for Home Renovators (Oct 2024); Conducted 8 in-depth interviews, mapped a 5-stage renovation journey, and redesigned the gallery into an interactive visual-first experience; prototype scored 20% higher in aesthetics and purchase interest. [view project poster]
- Eye Tracking Technology Study for Marketing and Design Practices in Corporate Routine (April 2025); Led an experimental study benchmarking 3 AI eye-tracking tools vs. human judgment (Recall & Precision), finding AI captured <50% of key visual focus areas; interviewed 8 SCG marketers to recommend where AI can support (not replace) preliminary ad screening. [view project poster]

UX/UI Designer at Department of Language and Information Technology

01/2025 – 04/2025 | Student Organization | Bangkok, Thailand

- Led the UX/UI design for the department website, from requirements and concept development to implementation.

Product Designer at MonkMe

01/2025 – 04/2025 | Amulet Trading and Rental | Bangkok, Thailand

- Led the UX/UI design for desktop and mobile platforms for MonkMe for the Startup Thailand League 2024 Case Competition.

Project Manager Intern at VISAI.ai

05/2024 – 08/2024 | AI & ML Solutions Provider | Bangkok, Thailand

- Coordinated cross-functional teams on AI product development.
